

UNC CFAR Social and Behavioral Science Research Core SABI Database

INSTRUMENT TITLE: *"Kaneko Self-Efficacy of Safe Sex"*

SOURCE ARTICLE: Kaneko, N. (2007). Association between condom use and perceived barriers to and self-efficacy of safe sex among young women in japan. *Nursing and Health Sciences*, 9(4), 284.

RESPONSE OPTIONS: A five-point Likert type response format was used by respondents to rate items from 5 ("very sure I could") to 1 ("very sure I could not").

SURVEY ITEMS:

- (i) confidence to use condoms correctly from beginning (as soon as erection occurs) to end (ejaculation)
- (ii) confidence to use a condom under the influence of alcohol
- (iii) confidence to refuse sex if neither my partner nor I have a condom at hand
- (iv) confidence to discuss condom use with a new partner
- (v) confidence to persuade my partner to use a condom
- (vi) confidence to refuse sex if my partner objects to using a condom.

TERMS OF USE:
