INSTRUMENT TITLE: *Self-efficacy for Disclosing HIV Status to a Sex Partner*

SOURCE ARTICLE: Mizuno, Y., Purcell, D. W., Latka, M. H., Metsch, L. R., Gomez, C. A., & Latkin, C. A. (2007). Beliefs that condoms reduce sexual Pleasure—Gender differences in correlates among heterosexual HIV-positive injection drug users (IDUs). *Journal of Urban Health*, 84(4), 523-536.

**RESPONSE OPTIONS:**

1. Absolutely not
2. Pretty sure I cannot
3. Not sure
4. Pretty sure I can
5. Absolutely sure I can
6. Refuse to answer

**SURVEY ITEMS:**

1. I can tell a new sex partner my HIV status before having sex even if I am really attracted to them.
2. I can tell a sex partner my HIV status before having sex even if they might know some of my friends.
3. I can tell a sex partner my HIV status before having sex even when I'm depressed or really upset.
4. I can tell a sex partner my HIV status before having sex even if my partner did not know I was HIV positive the first time we had sex.
5. I can tell a new partner my HIV status before having sex even if I'm worried that they wouldn't have sex with me if they knew.
6. I can tell a sex partner my HIV status before having sex even if they have not told me their HIV status.
