SABI Database

INSTRUMENT TITLE: Unspecified Adherence Questionnaire

SOURCE ARTICLE: Goldman, J. D.; Cantrell, R. A.; Mulenga, L. B.; Tambatamba, B. C.; Reid, S. E.; Levy, J. W.; Limbada, M.; Taylor, A.; Saag, M. S.; Vermund, S. H.; Stringer, J. S.; Chi, B. H. (2008). Simple adherence assessments to predict virologic failure among HIV-infected adults with discordant immunologic and clinical responses to antiretroviral therapy. *AIDS Research and Human Retroviruses*, 24(8): 1031-1035.

POPULATION: Women, men, HIV-positive, patients, adolescents

RESPONSE OPTIONS: Number of missed doses in the past 3 days.

SCORING: Categorized into two groups: those with any missed doses and those with no missed doses

SURVEY ITEMS: Not reported

RELIABILITY INFORMATION: No reliability information was reported.

VALIDITY INFORMATION: Criterion-related validity was assessed via comparison with viral suppression (sensitivity analysis).

TERMS OF USE:

Individuals may use this information for research or educational purposes only and may not use this information for commercial purposes. When using this instrument, please cite:
