SABI Database

INSTRUMENT TITLE: VAS: Visual Analogue Scale

SOURCE ARTICLE: Badiee, J., Riggs, P. K., Rooney, A. S., Vaida, F., Grant, I., Atkinson, J. H., & Moore, and the HIV Neurobehavioral Research Program (HNRP) Group, D. J. (2012). Approaches to identifying appropriate medication adherence assessments for HIV infected individuals with comorbid bipolar disorder. *AIDS patient care and STDs*, 26(7), 388-394.

POPULATION: Women, men, HIV-positive, Bipolar patients

RESPONSE OPTIONS: Placed an X on a line showing how much of their ART medications they have taken in the past 30 days (0% on one end, 100% on the other)

SCORING: Adherent: $\geq 95\%$; Nonadherent: $<95\%$

SURVEY ITEMS: A scale indicating ART adherence over the past 30 days.

RELIABILITY INFORMATION: No reliability information reported.

VALIDITY INFORMATION: Criterion-related validity assessed via comparison with Medication Event Monitoring System (MEMS).

TERMS OF USE:

Individuals may use this information for research or educational purposes only and may not use this information for commercial purposes. When using this instrument, please cite:
